Subject: Re: Historical data on 4t & █

It was RCL and Poloniex before 2018.

I would not want to provide any more data on the old companies than that of the Excel spreadsheets.

Maybe inform this is not your company any more after you exited and the company stopped operating and you don't have access to the accounts (which as per the MOU you don't).

Even then, it's a big project to collate all the info and determine the relevant jurisdictions at the time. We're hoping to have something to you by tomorrow. Sorry for the delay.

I'm working on a project for Chris, we are looking to get some historical data from 4t & █
from 2015-2019. We want to know which exchanges were used on all the trades on these two
bots since 2015. For 2020, within Tableau, it was easily accessed from the "Daily Sales" tab,
the break down on each exchange is what we are looking for (e.g. image below). I looked
through the old spreadsheets and can't find it, is this something that you have and can provide
to me easily?
